THOMAS J. GALIA

Ardmore, PA 19003 | 610.348.2483 | tom.galia@outlook.com

PROFESSIONAL SUMMARY

Healthcare data transformation leader who bridges the gap between clinical needs, business objectives, and technical execution. With 15+ years driving complex healthcare IT initiatives, I excel at translating fragmented data ecosystems into standardized, cloud-enabled platforms that unlock clinical insights and accelerate research. My strength lies in collaborative leadership—facilitating alignment across stakeholders, maintaining project visibility, and driving issues to resolution while delivering measurable business value.

Core Competencies: OMOP/OHDSI Implementation • Cloud Architecture (Azure, AWS, Oracle) • Clinical Data Standardization • Stakeholder Facilitation • Agile/Scrum Leadership • Healthcare Analytics • Real-World Evidence Solutions • Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

Veradigm, Philadelphia, PA

Senior Development Manager, Life Sciences Engineering | 2023 – Present

Lead cross-functional engineering teams delivering innovative healthcare data solutions using Azure Cloud technologies. Drive product roadmap execution while facilitating collaboration between clinical, technical, and business stakeholders.

- Led development of Study Survey Manager, facilitating real-time patient outreach through Veradigm's portal—collaborated with product, clinical, and UX teams to deliver from concept to production in 8 months
- Spearheaded Registry Application Modernization, partnering with external development teams to migrate legacy WebForms applications to Blazor, improving performance by 40% and reducing technical debt
- Championed Code Set Manager initiative—gathered requirements from clinical informaticists and translated them into technical specifications supporting standardized clinical data mapping across multiple therapeutic areas

IQVIA, Plymouth Meeting, PA

Data Analytics Manager | 2017 – 2023

Served as senior consultant and product owner leading complex health data conversion projects for clinical trials and observational research. Primary liaison between external pharmaceutical clients and internal technical teams.

- Led 12-person Agile team converting multi-source health data assets to OMOP Common Data Model—delivered 25+ conversion projects with 99.7% data quality scores through implementation of automated, data-driven validation processes
- Designed and deployed enterprise data mart and SQL Reporting Services platform, enabling on-demand access to IQVIA OMOP data assets—reduced ad-hoc reporting requests by 75% and accelerated client proposals

- Facilitated requirements definition for 30+ client projects, analyzing EHR records, insurance claims, and specialty databases—translated complex clinical and business requirements into executable technical specifications
- Consulted with SpinSys on Defense Health Agency OMOP implementation and with University of Pennsylvania on Epic OMOP integration—provided strategic guidance on data mapping strategies, validation frameworks, and clinical stakeholder engagement across large-scale federal and academic medical center deployments

Turnstone Healthcare IT Consulting, Havertown, PA

Principal Consultant | 2010 – 2017

Delivered business intelligence and analytics consulting to Penn Medicine network (Hospital of the University of Pennsylvania, Penn Presbyterian Medical Center, Pennsylvania Hospital) and healthcare technology vendors.

- Architected SQL Server data marts using SSIS and ETL processes to aggregate operational data—enabled real-time dashboards supporting hospital throughput, bed management, and resource utilization decisions
- Developed executive dashboards using Tableau, Crystal Reports, and SQL Reporting Services—translated complex operational metrics into actionable KPIs for C-suite and department leaders
- Partnered with operations managers, nursing leadership, and physicians to establish performance measurement frameworks—facilitated consensus on KPIs across competing stakeholder priorities

Hospital of the University of Pennsylvania, Philadelphia, PA

Business Intelligence Manager, Operations Analytics | 2007 – 2011

- Managed team of BI analysts supporting hospital operations improvement initiatives—designed and maintained real-time operational dashboards using Crystal Reports Server, SharePoint, and SQL Reporting Services
- Developed SSIS packages for ETL processing and advanced SQL queries supporting departmental KPI tracking and process improvement projects
- Established data governance practices and reporting standards across multiple hospital departments—coordinated with internal IT and external vendors to ensure high availability and timely service delivery

TECHNICAL PROFICIENCY

Cloud & Data Platforms: Azure (SQL Database, Data Factory) • AWS (S3, Redshift) • Oracle Cloud • Snowflake

Healthcare Standards: OMOP Common Data Model • OHDSI Toolstack (Atlas, Achilles, WebAPI) • HL7 • FHIR

Data & Analytics: SQL Server (T-SQL, SSIS, SSRS) • PostgreSQL • Tableau • Power BI • Python (pandas, data analysis)

Development & Collaboration: Blazor • .NET • Git/Azure DevOps • SharePoint • Agile/Scrum methodologies

Data Sources: EHR systems (Epic, Cerner, Allscripts) • Claims databases • Clinical trial data • Patient registries

EDUCATION

Executive MBA | Drexel University, LeBow College of Business, Philadelphia, PA

Bachelor of Arts, English | University of Delaware, Newark, DE
